1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

1000

[illegible]

On the 20th July 1960, the following were the only two species of *Phrynosoma* recorded from the area. The first was *Phrynosoma macleayi* (Lacépède) and the second was *Phrynosoma hernandesi* (Lacépède). The first was recorded from the area of the first survey and the second was recorded from the area of the second survey.

$\mathcal{P} = \{P_1, \dots, P_n\}$

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium for 24 h at 28 °C. The cell concentration was adjusted to 1.0 × 10⁸ cells/mL. The cell suspension was then diluted with distilled water to the indicated concentrations. The transformation efficiency was determined by the number of transformants per 10⁶ cells. The data are the mean ± SD of three independent experiments.
