EEM and Virtual Programs

CEPI is receiving many requests for new school codes from districts that are offering a new virtual program. MDE is reviewing their policy stance during the pandemic, since most schools are likely to implement a variation of virtual programming. In the meantime, they have shared that districts can still offer a virtual program as outlined in 21f (5-0-D in the [Pupil Accounting Manual](#)) without a new building code being issued in EEM.

Within EEM, three different types of virtual education can be denoted at the building level: Full Virtual, Face Virtual, and Supplemental Virtual. A school building can include multiple virtual educational settings to reflect the variety of virtual programming available to students.

For directions on how to add these educational settings to your schools, please refer to the [How to Add or Remove an Educational Setting](#) in the EEM guide. Definitions of the various educational settings can be found in the [EEM Glossary](#). For help establishing local reporting, we recommend working with your software vendor to establish local reporting/group/class codes that will enable you to meet your goals.
