

of her late respects, in the tenth October.

1. *Hippocampal*, which is first stage, and can be held to orient for hours. It has a dark brown, mottled, & *luteolus* coloration, with a dorsal crest, and a dorsal fin, which is long, narrow, & thin, and a ventral fin, which is short, broad, & thick. The body is elongated, and the head is large, with a large mouth, and a small nostril. The body is covered with scales, and the head is covered with a layer of skin. The body is elongated, and the head is large, with a large mouth, and a small nostril. The body is covered with scales, and the head is covered with a layer of skin.

2. La pionera, *Urtica dioica*, de arena seca y sin dientes de escamas, los órganos reproductores están ocultos en la base del tallo, las hojas son opuestas y tienen un efecto irritante. La otra especie es *Urtica pilulifera*, que tiene dientes de escamas y sus órganos reproductores están en la parte superior del tallo.
