PROGRAM REVIEW COMMITTEE REPORT

September 7, 2011

Chairperson: T. Thompson

Members: R. Armstrong, M. Johnson, A. Perry

Annual Report

Andrews University (BSN)

The committee continues to be very concerned about the continued low performance of the NCLEX results. The report was received and approved pending third quarter NCLEX results. Further action maybe required if the results do not show significant improvement.

Calvin College (BSN)

The report was received and approved. The committee commends the school's multiple efforts to expand diversity.

Finlandia University (BSN)

The report was received and approved.

Grand Rapids Community College (PN/ADN)

The reports were received and approved.

Grand Valley State University (BSN)

The reports was received and approved. The committee commends the school on the HRSA grant program to expand diversity. The committee needs the level objectives submitted which was not included in the report.

Henry Ford Community College (ADN)

The report was received and approved.

Hope College (BSN)

The report was received and approved.

Lake Superior State University (PN/BSN)

The reports were received and approved. The committee directs the school to appoint a qualified interim director of the nursing program immediately. The school needs to send credentials along with a letter from the dean to the Bureau of Health Professions. The committee wants verification that the faculty members with Canadian nursing licenses are only doing clinicals in Canada. Any individual doing clinicals in Michigan must have a Michigan nursing license. The committee requests the school to continue implementing the NCLEX improvement plan.

Monroe County Community College (PN)

The report was received and approved. The committee requests the submission of the attrition plan.

West Shore Community College (PN/ADN)

The report was received and approved. The wording in the outcomes needs to be strengthened to show leveling and mastery of content. The committee recommends a review of Bloom's Taxonomy. The curriculum changes need to be resubmitted with current and proposed change with rationale. The changes are not approved.

Self Study

Monroe County Community College (ADN)

The self study was received and approved as an accredited school. The program is on warning status with new self study in 2 years.

Montcalm Community College (PN/ADN)

The self study was received and tabled until November. The committee requests the resubmission of the self study body (not appendices) without proposed changes. The proposed changes should be submitted separately.

Stautzenberger Institute (PN)

The self study was received and tabled until the following information is presented. As per the letter dated May 5, 2011, the school would only be allowed to admit once a year 24 students. No additional students can be added if someone withdraws or fails. This is all part of showing the level of attrition for the program. All nursing schools in Michigan follow this requirement. The clinicals for acute care is very limited, and there is no evidence of OB/PEDS at all. Contracts must be received in these areas. The budget does not have a narrative to explain the figures. There is no independent financial audit to show evidence that the school is self-sufficient for the two years without tuition. The budget present is not sufficient. The outcomes for 1, 2, and 10 are not measurable. The need for students to prove basic nursing skills, if already a CNA, seems to be redundant within NUR 105. The grievance policy does not provide information for a student to be able to file one. The candidate admission process step should have a date for when all information can be received for the admissions committee. Some of the policies for student appearances could be discriminatory. NUR 145 has the care of pediatric patients in the adult care course. The sequencing of BIO 115 and BIO 125 are concurrent with NUR 145 and NUR 205. This does not allow the students to build on knowledge of A&P and apply it in the Med/Surg experience. The descriptions on many of the courses do not match with what the content the course title implies. The committee still does not see whether the school has established need in the area for this LPN program. The job information presented does not show high need or job availability.

Major Program Change

Baker College Owosso (ADN)

The major program change was received and approved.

Baker College Auburn Hills (PN/ADN)

The major program change was received and approved.

Eastern Michigan University (BSN)

The major program change was received and approved for the increase of 15 students.

Hope College (BSN)

The major program change was received and approved.

Madonna University (BSN)

The major program change was received and approved.

Montcalm Community College (PN/ADN)

The major program change was received and tabled. The rationale needs to be submitted for the major changes.

Initial Application

ITT-Troy (ADN)

The application was received and denied. ITT- Canton must receive full board approval before one other ITT campus can apply to conduct a nursing program.
