Wildlife Division Report No. 2905

November 1981

MICHIGAN FURBEARER CATCH BY TRAPPERS, 1980-81*

by Louis J. Hawn

This report presents estimates of trapper catch of some of Michigan's important furbearers for the 1980-81 trapping seasons. The estimates are generated from responses to mail survey questionnaires sent to a randomly selected sample of holders of trapping licenses and senior hunting licenses, both of which confer authority to trap.

Presented for comparison are the results of similar mail surveys conducted after the 1969-70 and 1970-71 seasons. No mail surveys were conducted or estimates available during the nine year interim period because of rapidly increasing numbers of sportsman's license holders who were authorized to trap during that time period. Since only a very small percentage of them trapped, a mail surveys estimating system was not practical. Somewhat of a similar problem exists at the present time with senior hunting license holders, however, no rapid increase in their numbers is expected.

The species included in this report are the muskrat (*Ondatra zibethica*), mink (*Mustela vison*), raccoon (*Procyon lotor*), opossum (*Didelphis marsupialis*), striped skunk (*Mephitis mephitis*), weasels (*Mustela sp.*), red fox (*Vulpes fulva*), and coyote (*Canis latrans*). Estimates for beaver (*Castor canadensis*), river otter (*Lutra canadensis*), and bobcat (*Lynx rufus*), are available from mandatory registration counts and can be obtained by writing directly to the Furbearer Management Specialist, Wildlife Division, Box 30028, Lansing, MI 48909.

MAIL SURVEY DATA

Survey of Trapping License Buyers

	1969-70	1970-71	1980-81
Questionnaires sent	768	638	1,086
Questionnaires returned	719	595	865
Non-deliverable	11	7	42
Non-response	38	36	179
Percent of delivered questionnaires returned	94%	93%	83%
Trapping licenses sold	7,530	6,161	15,208
Percent of licensees not trapping for included species	11%	10%	7%
Estimated trappers	6,680	5,560	14,120

Survey of Sportsman's License Buyers (1970-71)

Survey of Senior Hunting License Buyers (1980-81)

Questionnaires sent	2,791	664
Questionnaires returned	2,423	591
Non-deliverable	49	14
Non-response	319	59
Percent of delivered questionnaires returned	87%	91%
Sportsman's or Senior Hunting licenses sold	15,170	56,199
Percent of licensees not trapping for included species	89%	97%
Estimated trappers	1,620	1,520
